

View and Use Crime Stats with Caution

Per Sgt. Ford

Many groups view crime stats and use reported figures to compile rankings of cities. These rankings, however, are a quick choice made by the data user; they provide no insight into the many variables that mold the crime in a particular city. Consequently, these rankings lead to simplistic and/or incomplete analyses that often create misleading perceptions adversely affecting cities, along with their residents.

- Population density and degree of urbanization.
- Variations in composition of the population, particularly youth concentration.
- Stability of the population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength and size of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system
- Citizens' attitudes toward crime.
- Crime reporting practices of the citizenry.

2009 Crime Per Person

2009 Crime in Utah Report
